1. About the Organization

Flipkart is India's leading e-commerce marketplace offering over 150 million products across 80+ categories, revolutionizing retail through customer-centric innovation.

2. Key Roles & Responsibilities

- Build robust backend services powering real-time warehouse automation and delivery tracking.
- Implement high-throughput event queues with Apache Kafka and RabbitMQ.
- Design schema models and optimize query performance on MySQL, HBase, and Cassandra.
- Ensure sub-millisecond API latencies during mega-sale traffic events.

3. Technical Requirements & Qualifications

- Strong problem-solving and coding skills in Java, Python, or Go.
- Sound knowledge of Data Structures, Sorting, Graph Algorithms, and Trees.
- Understanding of Relational & NoSQL database concepts.
- High energy, self-starter mentality, and ability to thrive in hyper-growth environments.

4. Selection & Interview Process

- Step 1:** Round 1: Flipkart Online Coding Assessment (HackerEarth)
- Step 2:** Round 2: Technical Interview I (Data Structures & Algorithmic Design)
- Step 3:** Round 3: Technical Interview II (System Fundamentals, OOPs, Database Queries)
- Step 4:** Round 4: Hiring Manager / Culture Fit Round
