1. About the Organization

Oracle offers suites of integrated applications plus secure, autonomous infrastructure in the Oracle Cloud. We empower organizations to innovate and scale.

2. Key Roles & Responsibilities

- Architect and execute client migrations from on-premises datacenters to Oracle Cloud Infrastructure (OCI).
- Configure Autonomous Database instances, Exadata clusters, and VPC interconnects.
- Author Infrastructure-as-Code automation using Terraform and Ansible.
- Provide post-migration performance tuning and high-availability architecture consultation.

3. Technical Requirements & Qualifications

- Strong knowledge of Relational Database Management Systems (Oracle DB, PostgreSQL) and SQL.
- Understanding of Cloud computing architecture, Virtualization, and Storage topologies.
- Proficiency in Linux system administration and shell scripting.
- Strong problem-solving capability and client-facing communication skills.

4. Selection & Interview Process

- Step 1:** Round 1: Online Technical Assessment (Databases, OS, Networking & Coding)
- Step 2:** Round 2: Technical Interview I (Database Design, SQL Queries & Architecture)
- Step 3:** Round 3: Technical Interview II (Cloud Infrastructure & Troubleshooting)
- Step 4:** Round 4: Managerial & HR Alignment Round
