### 1. About the Organization

Wipro is a leading technology services and consulting company focused on building innovative solutions that address clients' most complex digital transformation needs.

### 2. Key Roles & Responsibilities

- Conduct managed threat hunting and triage telemetry from multi-tenant client SOCs.
- Respond to security alerts, ransomware outbreaks, and phishing incident lifecycles.
- Maintain vulnerability management scans and track patch remediation across client assets.
- Generate weekly threat posture metrics and compliance readiness reports.

### 3. Technical Requirements & Qualifications

- Good knowledge of Information Security principles, Firewalls, IDS/IPS, and Endpoint Security.
- Familiarity with Windows Event logs, Linux Syslog, and Network traffic analysis.
- Basic scripting in Python or PowerShell for automated log analysis.
- Strong communication skills for incident documentation.

### 4. Selection & Interview Process

**Step 1:** Round 1: Online Aptitude & Coding Assessment (Elite / Turbo Track)

**Step 2:** Round 2: Technical Interview I (Networking, Security Protocols & OS Fundamentals)

**Step 3:** Round 3: Technical Interview II (Incident Response & Case Scenarios)

**Step 4:** Round 4: HR & Cultural Fitment Round
